

TECHNOFLEX RABBIT HIGH FREQUENCY POKER

MOTOR

ELECTRICAL PHASE:

Power: 2.800 W

Current: 230 V – 50/60 Hz

Speed: 16,000 rpm (no load)

outer shell: FV polyamide

ELECTRICAL PHASE:

Power: 2,800 W

Current: 115 V – 50/60 Hz

Velocity: 16,000 rpm (no load)

outer shell: FV polyamide

The Rabbit comprises of an Electric motor that powers a mechanical drive cable to the head which incorporates a double bearing to provide a high frequency 12,000 vpm's. The shafts are interchangeable via a quick connect system, that allows you to quickly change flex lengths and vibrator head sizes. The Rabbit 110v Motor is held in stock for use on UK construction sites.

Note for our oversea's customers, and UK sites that permit the use of 230v with RCD's, a 220v electric motor is available on special order by request.

The most powerful electric vibrator on the market.

The Technoflex high frequency electric concrete poker is mechanically driven, this gives you high amplitude vibration and the ability to quickly change the flex and head sizes..

- CE approved double isolation electric motor provides highest protection for the worker
- Light weight
- Great zone of action and vibration
- Long- lasting flexible shaft

Easy to connect.

Can be purchased as motor alone or with the flex/head of your choice.
