36 Inch Pedestrian Trowel

This powerful 4 blade 36" ride-on trowel is used to level concrete across slabs and bays. Speedcrete have developed this machine as the ultimate concrete professional for use in the United Kingdom. This power float has an easy pitch control machine is powered by the petrol GX160 Honda engine giving you plenty of power on the slab.

This power float comes with a trolley which is specially designed to move the float around site and to aid blade changes meaning that there is no more waiting around for a forklift to lift your rider.
