SC30 SIX BLADE EDGING TROWEL

www.speedcrete.co.uk

SC30 SIX BLADE EDGING TROWEL

Speedcrete supply this 30" petrol powered Pedestrian Edging Power with 6 blades & pan included.

This trowel allows for rapid completion of concrete slab edge work and around up-stand areas.

With a powerful and reliable Honda GX160 petrol engine this 30"/762mm float provides ample power to handle the usage of the pan (floating wheel) which comes free with this 6 blade machine.

PAN

Pan dimensions: 30 inch.

Material: Steel.

BLADES

Blade dimensions: 9¼ x 5 inch.

Material: Steel.

We stock replacement blades, check out our website and search for product code 20454.

SC30 SIX BLADE EDGING TROWEL

Speedcrete like to bring innovation to the UK market.

Concrete professionals in the United Kingdom always give us feedback on products or suggestion ways to improve their projects. We decided to introduce a 6 blade edging trowel to allow our customers to get on the concrete earlier with the pan.

We also decided to supply this edger with a slightly larger gear box to gain more controlled power with the extra weight of this machine.

As with all our products we stock parts which can be purchased off-the-shelf when required. We also have in-house engineers who can carry out a service or carry out necessary repairs.

COMPATIBLE WITH SPEEDY-CLEAN

Simply add the Speedy-clean to a foamer, spray the foam onto the concrete covered equipment. This foam will then begin to dissolve and break down the concrete ready to be jet-washed clean.

POWERED BY HONDA GX160

Horse power: 5.5

Starter: Recoil starter.

LIFTING HOOK

This Edging Trowel comes supplied with a lifting hook. This is a helpful feature for placing the trowel wherever it is needed.
