

Introducing: The Multi-Vibe Hummer Concrete Vibrator

35% More Power with New Honda GX35 Engine Concrete Poker.

Combine the reliability of Honda commercial 4 stroke engines with the quality of Multi-Vibe poker units and you get an exceptional tool which is designed to last.

These pokers can be run on a multiple head sizes allowing them to generate superior compaction performance and consistency in their operation. The powerful Honda motor ensures a lightweight design without sacrificing performance. Ideally suited for light to medium concrete jobs or hard to reach locations, this unit will be the envy of your competition.

Vibrating concrete helps to remove air bubbles and ensures the concrete penetrates tight crevices. Without the concrete vibrator the unmistakable honeycomb effect presents. These vibrators can be used on slabs, footpaths, footings and most other castings effectively. Ensure your jobs get the professional finish and strength required to making your clients happy they hired you.

The Multi-Vibe GX35 combination presents the following features:

- Powerful Honda GX35 4 stroke engine
- Lightweight portable design
- A choice of head and vibrator assembly
- Ergonomic carry harness/strap
- Easy access controls

SPEEDCRETE[™]

HM100

HM800

HV200

Maximise your capital outlays by combining the Honda powered Multi-Vibe with a screed frame.

Without the use of workshop tools, the Honda 4-stroke engine unit and flexible hose/vibratory assembly can be quickly attached to a 2-handled frame assembly screed frame giving you two machines in one simple package.

This effective combination allows you to quickly and easily vibrate air pockets from your slab, then simply clamp the poker into the screed frame to screed off your finished slab.

The 'Dual Purpose' Hummer screed is manufactured in lightweight aircraft aluminium alloy, meaning a long lasting durable screed that takes the strain.

We advise that maximum length of Floater Bars shouldn't exceed 16ft (4.87) metres.

Feel free to make contact to discuss your requirements and ask any questions in regards to the equipment shown in this information material.
